

Chapter 208, SEWERS

[HISTORY: Adopted by the Mayor and Council of the Borough of Laurel Springs 2-1-1965 by Ord. No. 209 (Ch. 66 of the 1973 Code); amended 6-25-1973. Subsequent amendments noted where applicable.]

GENERAL REFERENCES

Sewerage Authority -- See Ch. 57.

Uniform construction codes -- See Ch. 101.

Streets and sidewalks -- See Ch. 229.

§ 208-1. Definitions.

As used in this chapter, unless a different meaning clearly appears from the context, the following words shall have the following meanings:

BUILDING -- Any building or structure heretofore or hereafter constructed and designed or used for dwelling purposes, either temporarily or permanently, or other use or occupancy by persons or to which the public is invited.

CONNECTION DATE -- When used with respect to a building constructed prior to the date of initial operation, as a part of any sanitary sewage treatment and disposal system in the Borough, owned or operated by the Borough of Laurel Springs or the Laurel Springs Sewerage Authority, of a sewer in the public street upon which said building is located, means the 120th day next ensuing after said date of initial operation, and, when used with respect to a building constructed after the date of initial operation, as a part of any sanitary sewage treatment and disposal system owned or operated by the Borough of Laurel Springs or said Authority, of a sewer in the public street upon which said building is located, means the 60th day of completion of construction or the date of initial occupancy of said building, whichever of said dates shall be earlier in point of time.

SEWER -- Any sewer or main designed or used for collection or disposal of sanitary sewage and located in any public street in the Borough of Laurel Springs.

§ 208-2. Installation and connection of toilets.

The owner of any building located upon any public street in the Borough of Laurel Springs in which a sewer is now constructed or shall be hereafter constructed shall, prior to the connection date with respect to said building, install a toilet in said building, unless a toilet is then installed therein, and connect such building and every toilet therein with said sewer.

§ 208-3. Connection standards.

Every connection required by this chapter shall be made with soil pipe of cast iron, caulked and leaded, extending from inside the building foundation to a sewer, or to a point which is not less than five feet outside of said foundation and connecting therefrom to a sewer with soil pipe of cast-iron, asbestos-cement or vitrified-clay material with rubber gaskets or leaded joints. All soil pipes shall be not less than four inches in diameter, and every connection required by this chapter shall be made in a manner to discharge into said sewer all sanitary sewage originating in the building.

§ 208-4. Violations and penalties.

Any person or persons, firm or corporation who shall violate this chapter or any of its provisions shall, upon conviction, be subject to the penalties provided in Chapter 1, § 1-15, in the discretion of the court.
